INDEX TO VOLUME IV

AUTHORS INDEX

A

ALLEN, BUNDY. Removal of thirty denticles from one bicuspid socket, 358

B

BEASER, HARRY P. A loop-wire splint, 117
— Orthodontic treatment by parcel post, 170

C

CAVANAGH, WM. President's address before the Pacific Coast Society of Orthodontists, 209
CHAYES, E. S. Endocrinodontia, or the ductless glands—their expression in the human mouth, 120, 177
COHEN, M. B. An experimental study of root-filled teeth: Preliminary report, 36

D

DEWEY, MARTIN. A consideration of some principles of regulating appliances, 625
— The function of tooth form, 141
— The indirect method of anchor band construction, 74
— The mechanism of wire stretching, 333
— Three types of frenum labiorum, 461
DOWLING, J. T. The relation of the development of the nasal fossa to that of the oral cavity, 355
DUKE, WM. W. Pyorrhea alveolaris in relation to systemic disease, 189

E

ENGSTROM, CARL O. A band ring, 116
— A system of orthodontic records, 395
— Operation for the removal of the abnormal labii frenum superioris, 463

F

FEDERSPIEL, M. N. Multiple fracture of the mandible, causing a marked dentofacial deformity, the result of a dynamite explosion—method of treatment; surgical, orthodontic, and prosthetic, 269
— Some observations of the treatment of cleft palate, 497
FLINT, D. WILLARD. President's address delivered before the American Society of Orthodontists, Chicago, Ill., August 1, 1918, 522

G

GIFFORD, A. C. Compromise treatment, 646
— The possibilities of the lingual and labial arch—single or in combination, 173
GRAY, B. FRANK. A study in "Impactions" —Information wanted, 545
— Orthodontia in the year nineteen hundred eighteen, 203

H

HANAU, RUDOLPH L. Dental engineering—is it justified? 515
— Dental engineering: we assume—we conclude, 615
— Photo-surveys of the human denture, 58
HANSEN, HAROLD O. Roentgenograms of pulpless teeth, 431
HELLMAN, MILO. Observations on the form of the dental arch of the orang, 45

I

IVY, ROBERT H. Anatomy of the teeth and jaws, with special reference to roentgenogram interpretation, 124

J

JOHNSON, A. LEROY. The law of occlusion and the normal in orthodontia. A philosophic survey of recent tendencies in orthodontia in the light of science, 588

K

KELLEY, VARNEY A. Local and systemic effects of malocclusion, 401

L

LOURIE, LLOYD S. The concealed labial arch wire with spring extensions, 24

M

MANN, CHARLES C. Our moral responsibility, 466

MERSHON, JOHN V. The removable lingual arch as an appliance for the treatment of malocclusion of the teeth, 578

MOREHOUSE, H. L. Third molar influence in orthodontic cases, 345

O

OLIVER, OREN A. The evil effect of adenoids and tonsils upon the dental arches, 391

ORNDOFF, B. H. A discussion of what happens in a roentgen tube, 434

P

POWER, WM. B. A summary of the causes of malocclusion, with special consideration of those that come under frequent observation, and which should be studied and guarded against, 407

PRINCE, NORMAN C. A new dental roentgenographic film holder, 135

R

RAWLINGS, J. W. Why the malocclusion should be corrected during the eruptive period of the permanent teeth, 470

ROBINSON, RAY D. Further experience with the .020 arch wire, 87

RODGERS, F. C. How far can a tooth be moved without destroying the pulp? 620

ROGERS, ALFRED PAUL. Muscle training and and its relation to orthodontia, 555

— The development of occlusion, 272

S

SCIARONI, G. H. Radium in the treatment of sarcoma and carcinoma, 655

SIMPSON, CLARENCE O. Income tax information for dentists, 79

SKINNER, EDWARD H. Practical radiography for the orthodontist, 251

SNIDER, W. L. A new method for mounting dental films, 256

SOLLEY, A. A. Fractures of the mandible, 449

STEVENS, J. BERTRAM. How to fit and apply Angle's ribbon arch, 544

STOFT, W. E. A plea for more orthodontia, 404

SUGGETT, ALLEN HOLMAN. Democratizing dentistry, 638

T

TITUS, F. G. The growth and development of the jaws, 411

W

WEINBERGER, BERNHARD WOLF. The history of orthodontia, 92, 225, 297, 359, 416, 473, 531

— The results observed in a further study of prenatal causes of dentofacial deformities, 1

Z

ZABROCKI, JULIAN A. The uses of the x-ray in modern dentistry and medicine, 477

GENERAL INDEX

A

Abscesses, pyorrheal, 192
Adaptation, phenomena of, 593
Adenoids and tonsils, evil effect of, on dental arches, 391
  gritting the teeth as a sign of, 42
Adrenodontia, 181
Alumni Society of the Dewey School of Orthodontia, meeting of the, 662
American Institute of Dental Teachers, 138, 662
American Red Cross Home Service, 624
American Society of Orthodontists, meeting of the, 202, 448
Amnion pressure causing malformations, 9
Anatomic landmarks in roentgenographic plates of the jaws, 131
Anatomy of human teeth, 149
  of the teeth and jaws with special reference to roentgenogram interpretation, 124
Anchor band construction, indirect method of, 74
Anchor teeth, rotation of, 585
Anchorage, stability of, requisite of efficient regulating appliance, 626
Anesthesia in plastic operations about the face, 456
Angle's ribbon arch, how to fit and apply, 544
Anode in the roentgen tube, 435
Antelope, teeth of, 146
Anterior rotations, 584
Appliance, universal regulating, 83
Appliances, a consideration of some principles of regulating, 625
  concealed labial arch with spring extensions, 24
  for expansion of arch, 364
  for physiologic tooth movement, 38
  principles of construction of, 276
  use of suitable metal for, 138
Applied anatomy and oral surgery for dental students, 202
Arch, appliance for expansion of, 365
  construction of, 579
  enlargement of the, 310
  shortening the, 314
  use of, 581
  wire bending, 579
  wire, .020, further experience with, 87
  wire, .020, technic for using, 88
Artificial teeth in cases where teeth are missing, 646
Atoms and molecules, relative sizes of, 437
Auxiliary springs, 581, 583

B

Band ring, 116
Bands, 309
  on teeth continually, effect of, 524
Blood count in orthodontic cases, 406
Bodily movement of teeth, 321
Bone transplantation in fracture of the mandible, 455
Bridle apparatus, 316
Brooklyn experiment in democratizing orthodontia, 643
Buccinator, 290

C

Cap, head and chin, 428
Carcinoma, radium in treatment of, 655
Care of the mouth during orthodontic treatment, 212
Careless dental work, 193
Cast inlay suit lost by plaintiff, 200
Cathode in the roentgen tube, 435
Cathode rays, 439
Causes of malocclusion, 407
Children, teeth in development of, 639
  transmission of resemblance from parents to, 365
Chin cap, 543
Cleft palate, etiology of, 498
  tension plates used for, 510
  treatment of, 497
Cleveland experiment in democratizing orthodontia, 643
Clinics for dental work, 222
Compromise treatment, 646
Congenital malformation, 3
Congenital malformations of the lower jaw, 372
Construction of anchor bands by indirect method, 74
Construction of appliances, 276
Construction of arch, 579
Crippled soldier, duty of the employer in the reconstruction of the, 329

D

Deciduous teeth, care and development of, 409
Deformities of the upper jaw, 228
Democratizing dentistry, 638
Democratizing orthodontia, 525
Dental arches, evil effect of adenoids and tonsils upon, 391
  of the orang, observations on the form of the, 45
Dental bacteriology in relation to dental caries, 550, 551
Dental curves, 61
Dental education, 216

Dental engineering, 204, 208, 548, 615
is it justified, 515
Dental films, holding in place for exposure, 254
mounting, 256
Dental roentgenographic film holder, 135
Dental splints in war injuries, 450
Dentistry, democratizing, 638
for all the people, 219
need of, shown by war, 638
public press in, 328
use of x-ray in, 477
x-ray in, 201
Dentofacial deformities, prenatal causes of, 1
Denticles, removal of thirty, from one bicuspid socket, 358
Development of child without conscious control, 573
of the jaws, 411
of occlusion, 272
of teeth, 414
Dewey School of Orthondontia, meeting of alumni of, 662
Diastema in the orang, 51
Displacements in fractures of the mandible, 453
Ductless glands in relation to the mouth, 120, 177
Dystrophy, 243

E

Education and eugenics, 388
Efficiency of regulating appliances, 626
Electrical discharge, 436
Employer, duty of, in reconstruction of the crippled soldier, 329
Empyema of maxillary sinus shown in radiogram, 478
Endocrine organs in relation to the development of the teeth, 14
Endocrinodontia, or the ductless glands, their expression in the human mouth, 120, 177
Engineering, dental, 204, 208, 515, 548, 615
Enlargement of the arch, 310
Eruptive period of the permanent teeth, why malocclusion should be corrected during, 470
Ethics of orthodontic patients, 483
Etiology of harelip, 498
Etiology of malocclusion, 407
Eugenics and education, 388
Exercise of mandibular muscles, 565
Exercises, application of, in orthodontia, 286
Extraction of teeth, indications for, 432
Extraction, result of, 524

F

Fees, orthodontic, 82
Film holder, 135
Finger springs, removable lingual wire with, 622
use of, in efficient regulating appliances, 628
Food in fracture of the mandible, 451
Force of occlusion, 423
Forsyth Dental Infirmary for children, staff appointments for the, 327
Fracture of mandible, 449, 454
bone transplantation in, 455
examination of, 451
radiogram showing, 481
splints used in, 457
Fracture of the jaws, some vital phases of, 654
Frenum labiorum, three types of, 461
Function of tooth form, 142
Functional activities of the teeth during orthodontic treatment, 578

G

Gag or crown applied to open the bite, 379
Gingival margin, weakness of, 326
Gonadodontia, 179
Gritting of the teeth as a sign of adenoids, 42
Growth and development of the jaws, 411
Gum-chewing in control of muscles, 559
Gunning splint, 458

H

Half round tubes, location of, on molar bands, 579
Harelip in connection with cleft palate, 497
Hawley calipers for measuring arch wire, 581
Head cap used to shorten the teeth, 97, 99
Health, good teeth essential to, 219
Hereditary transmission of peculiarities in arrangement of teeth, 382
Heredity and environment in development of man, 594
Heredity as cause of malformation, 2
History of orthodontia, 92, 224, 297, 359, 416, 473, 531
Horse, teeth of, 147
Human denture, photo-surveys of, 58
Human embryo, development of, 5

I

Identification of films in radiography, 253
Impacted teeth, opening space for, 585
Impaction of third molar, shown in radiogram, 479
Impactions, a study of, 544
Impression for indirect band making, 74
Incisor teeth, method of regulating, 535
Inclined planes and levers, treatment of irregularities with, 101

Income tax information for dentists, 79
Indirect method of anchor band construction, 74
Intermaxillary elastics for retention, 563
Internal secretions, 122
in relation to malocclusion, 13

J

Jackscrew, 361
applications of, 100
Jackson removable appliance, 627
Jaw, fractures of the, 449, 654
Jaws, growth and development of, 411
malignant tumors of the, 653
Jumping the bite, 103

K

Kangaroo, teeth of, 144
Kennedy, Dr. George D., 86
Kinesiology should be added to orthodontists' course of study, 558

L

Labial alignment wire in efficient regulating appliances, 628
Labial and lingual arch, single or in combination, possibilities of, 173
Labial arch wire with spring extensions concealed, 24
Labial movement of teeth, 586
Labidonty, 54
Labii frenum superioris, operation for the removal of abnormal, 463
Lingual and labial arch, single or in combination, possibilities of, 173
Lingual arch wire, removable, 578
Lingual arch with labial bar added, 601
Lingual wire appliance preferable when muscle training is to be instituted, 560
Lips, influence of, in modifying form of dental arches, 556
Locks in appliances, 89
Loop-wire spring, 117
Lowered resistance to infection as cause of pyorrhea, 195

M

Malformations, etiology of, 2
Malignant tumors of the jaw, 653
Malocclusion:
and mental deficiency, 659
and mouth infection, 136
causes of, 407
local and systemic effects of, 401
why it should be corrected during the eruptive period of the permanent teeth, 470
Mandible, fractures of the, 449
Mandibular canal, 130
Masseter, 290
Mastication, control of muscles of, 563
Material and sizes of wire for lingual arch, 580
Mechanical causes of malformation, 2
Mechanism of wire stretching, 333
Medicine and dentistry closely related, 216
Membership in American Society of Orthodontists, 523
Mental deficiency and malocclusion, 659
Mental development, relation of teeth and mouth to, 238
Mental foramen, 130
Metals for orthodontic appliances, use of suitable, 138
Metal plate, Salter's 378
Mirrors, use of, in photography, 70
Missing teeth, compromise treatment in cases of, 646
in orthodontic practice, 258
opening space for, 585
Modern dentistry, 445
Molar, third, influence in orthodontic cases, 345
Molecules and atoms, relative sizes of, 437
Moral responsibility, 466
Mountain lion, teeth of, 144, 145
Mounting dental films, 256
Mouth breathing caused by adenoids, 392
Mouth infection and malocclusion, 136
Movement, direction of, for different appliances, 561
Mucoperiosteal flaps, freeing of, in operation for cleft palate, 509
Multiple fracture of the mandible causing dentofacial deformity, 269
Muscle control, gum-chewing in, 559
Muscle exercise, 565-577
Muscle groups, 288, 564, 568, 569
Muscle training and its relation to orthodontia, 555
Muscular training in practice of medicine, 598
Myliobatis, teeth of, 143

N

Nasal fossa, relation of development of, to that of the oral cavity, 355
Nasal obstruction as a cause of malocclusion, 408
National Association of Dental Faculties, 202
National Dental Association, meeting of, 267
National Dental Board of Registration need of a, 198
Natural law, orthodontia founded upon, 590
Nonunion in fracture of the mandible, 454
Normal differs in individuals, 591

O

Occlusion, after fracture of mandible, 455
development of, 272
force of, 423
laws of, in orthodontia, 588
Operation for the removal of the abnormal labii frenum superioris, 463
Oral cavity, relation of development of nasal fossa to, 355
Orang, dental arch of, observations on the form of the, 45
Orthodontia, a plea for more, 404
exercises in, 286
history of, 92, 296, 359, 416, 473, 531
in the year 1918, 203
law of occlusion in, 589
missing teeth in, 258
muscle training in relation to, 555
radiography in, 251
teaching of, in dental schools, 212-217
teaching of, to undergraduates, 604
third molar influence in, 345
Orthodontic appliances, use of suitable metal for, 138
Orthodontic patients, ethics of, 483
Orthodontic records, a system of, 395
Orthodontic treatment by parcel post, 170
Orthodontics and the National Dental Association, 41
Orthophotographic apparatus, 59
Orthophotographs, 58
Osteomyelitis, 190

P

Pacific Coast Society of Orthodontists, fifth annual meeting of the, 85
Palatine canal, posterior, 130
Parrot-fish, teeth of, 143
Parsons, Dr. John W., death of, 218
Pathologic causes of malformations, 2
Pathology and bacteriology for dental students, 553
Patients, ethics of orthodontic, 483
Pegs vs. screws in cases of torsion, 249
People, dentistry for all the, 219
Photo-surveys of human denture, 58
Physiologic tooth movement, appliances for, 38
Physiologic tooth movement, painless, 629
Pickerel, teeth of, 142
Pithecoid characteristic, is labidonty a, 54
Pituitodontia, 179
Platysma, 290
Platysma myoides important in facial muscular development, 572
Pliers, wire-stretching, 334
Position of head in taking roentgenograms of the teeth, 131
Prenatal causes of dentofacial deformities, 1
President's address before the Pacific Coast Society of Orthodontists, 209
President's address delivered before the Amercian Society of Orthodontists, Chicago, Ill., 523
Preventive dentistry, 220
Principles of regulating appliances, 625
Professional policy, 642
Progress made in orthodontia, 209
Prophylaxis of malocclusion, 217
Psychologic considerations in orthodontia, 292
Pterygoid, 289
Public press in dentistry, 328
Pulp, how far can a tooth be moved without destroying, 620
Pulpless teeth, roentgenograms of, 430
Pyorrhea alveolaris, causes of, 189
in relation to systemic disease, 189
Pyorrheal abscesses, 192

Q

Qualitative science, 589
Quantitative science, 589

R

Radiation, 441
Radiograms, use of, in fracture of the mandible, 450
Radiographic technic, 252
Radiography, elementary and dental, 552
for the orthodontist, 251
Radium in the treatment of sarcoma and carcinoma, 655
Records, orthodontic, a system of, 395
Regulating appliances consideration of some of the principles, 625
Removable lingual arch as an appliance for treatment of malocclusion, 578
Removable lingual wire with finger spring, 622
Responsibility, our moral, 466
Retainer used by Hawley, 599
Retaining plate, 476
Retention, 587
in Class II cases, 562
Retracting anterior teeth, 307
Rhachitis, irregularity of teething diagnostic of, 242
Roentgen rays, 440
Roentgen tube, what happens in a, 434
Roentgenograms of pulpless teeth, 431
Roentgenographic anatomic landmarks in the upper jaw, 125
Roentgenographic film holder, dental, 135
Roentgenographic landmarks in the lower jaw, 130
Root-filled teeth, experimental study of, 36

Resemblance, transmission of, from parents to children, 365
Retarded eruption of permanent teeth, 382
Rotating appliance, 427
Rotating incisors, Hawes' method of, 372
Rotating teeth, 304
Rotation of first molars or anchor teeth, 585
Rotations, 583

S

Sarcoma, radium in treatment of, 655
School children, diseased or faulty mouths in, 639
Schools, examination of children in, 219
Science defined, 589
Screw gag, use of, in fracture of the mandible, 454
Service vs. results, a question of orthodontic fees, 82
Shortening the dental arch, 314
Six-year-old molars, 226
Skeleton skullcap, 104
Skull and mandibular splint, 458
Social dentistry, 223
Soldering of half round post to arch, 579
Splint, Gunning, 458
  loop-wire, 117
  skull and mandibular, 458
  used in fracture of the mandible, 457
Staff appointments for the Forsyth Dental Infirmary for Children, 327
Standards in development of occlusion, 273
Straggling teeth, 311
Surgical, orthodontic, and prosthetic treatment of multiple fracture of the mandible, 269
Sutures, placing and tying in cleft palate operations, 511
Swaging of bands over metal models, 74
Systemic and local effects of malocclusion, 401
Systemic disease, pyorrhea in relation to, 189

T

Teachers, our former, in Germany, 43
Teaching of orthodontia to undergraduates, 604
Technic for using .020 arch wire, 88
Teeth and jaws, anatomy of, with special reference to roentgenogram interpretation, 124
  development of, 414
  missing, compromise treatment in cases of, 646
  of antelope, 146
  of horse, 147
  of hyena crocuta, 146
  of kangaroo, 144
  of mountain lion, 144, 145
  of myliobatis, 143
  of parrot-fish, 143
  of pickerel, 142
  root-filled, 36
Teething, irregularities of, diagnostic of rhachitis, 242
Tension plates for use in cleft palate, 510
Teratogeny of dental anomalies, 418
Third molar influence in orthodontic cases, 345
Third molars, roentgenograms showing, 347-350
Thumb-sucking, results of, 248
Thymodontia, 183
Thyrodontia, 178
Tissues, changes in, in regulating teeth, 301
Tonsils and adenoids, evil effect of, on dental arches, 391
Tooth form, function of, 142
Tooth movement, individual, appliances allowing, 627
Tooth regulating machine, 379, 380
Treatment of cleft palate, 497
Treatment of orthodontia with lingual arch, 581
Tube, roentgen, what happens in a, 434

U

Universal regulating appliance, 83

V

Vomer cut in operation for harelip, 500
V-shaped maxilla, method of treating, 96
Vulcanite plate, 102, 385, 422, 539

W

War injuries of the jaw, 450
Wire, gauge, 599
  .020 arch, 87
  size for use in appliances, 634
Wire stretching, mechanism of, 333
Wiring the bone in fractures of the lower jaw, objections to, 451
Woodchuck, teeth of, 143

X

X-ray findings, interpretation of, 481
  in dentistry, 201
  in modern dentistry and medicine, use of, 477
  in orthodontia, 525
